National 5 Business Management

S5 Subjects

Higher English
Higher Mathematics
Higher Physics
Higher Design & Manufacture
Higher Modern Studies

S6 Subjects

Higher Mathematics
Higher Business Management
Young Applicants in School Scheme (YASS)
Advanced Higher Physics

ADVICE TO PUPILS

When you complete work experience be sure to ask for a certificate of completion or reference. Universities and employers often ask you to present proof of completion at an interview.

YOU need to put the work in. Yes, you can be anything you want to be, but you must be willing to put the work in.

Do the work, study, try your best and you are halfway to becoming what you want to be.

LEARNING OUTSIDE THE CLASSROOM

I attended 4 different companies for work experience; Woodward Inc, Collins Aerospace, Wallace McDowall and Spirit AeroSystems. I applied to these companies as I want to pursue a career in engineering specifically mechanical engineering.

MY ASPIRATIONS FOR THE FUTURE

I would like to complete a graduate apprenticeship for 3 reasons; I want to gain a university degree, earn a solid wage, and most importantly gain experience as when speaking to various managers within each company they said they are looking for people who have experience and not just a university degree.
