

Business Management

What is Business Management

Studying Business Management allows learners to develop the skills and qualities required to be a successful business entrepreneur. It illustrates the importance of business in today's society and that the business world is a vibrant and rewarding environment where the decisions made affect us all in our everyday lives. Business Management learners will develop an understanding of:

- how to set up in business
- the ways in which stakeholders influence a business
- how the needs of customers are satisfied
- functional areas within a business
- the ways in which internal and external factors affect business.

Pupils will also undertake some exciting business team events eg "The Kellogg's Challenge" and "The Sir Tom Hunter Challenge".

Key Skills	Careers
